

TARABA STATE GOVERNMENT

OFFICE OF THE HEAD OF SERVICE / MINISTRY OF FINANCE

Taraba State Employee Verification Portal

Comprehensive End-to-End User Manual & Administrative Guide

Document Version:	v2.4 (Enterprise Edition)
Target Audience:	Civil Servants, Departmental Admins, System Auditors
Supported Modules:	Employee Self-Verification, Admin Dashboard, RBAC, File Manager
Security Classification:	Official / Confidential
Last Updated:	August 2026

Notice: This manual provides operational guidance for public employee verification and administrative portal management under Taraba State Civil Service digitized verification standard.

1. Executive Summary & System Overview

The **Taraba State Employee Verification Portal** is a state-of-the-art digital infrastructure platform designed to validate, record, and maintain authentic civil service records across all Ministries, Departments, and Agencies (MDAs) in Taraba State.

Key Objectives of the Platform:

- **Eliminate Ghost Workers:** Integration with the National Identity Management Commission (NIMC) via National Identification Number (NIN) verification guarantees identity authenticity.

- **Streamline Payroll & Service Records:** Automated capture of Grade Levels, Steps, Service Numbers, Cadres, PFA pension data, and Bank Account (NUBAN) details.
- **Centralized Document Repository:** Secure digital archiving of educational certificates, birth certificates, letter of first appointment, and promotion notices.
- **Granular Administrative Governance:** Role-Based Access Control (RBAC) enabling designated officers to inspect, audit, approve, or decline employee records.

2. Architecture & Access Roles

The portal enforces strict separation of concerns across public self-service portals and restricted administrative dashboards:

Role	Target User	Access Level & Key Capabilities
Public / Employee	Civil Servants / Applicants	Access to /register and /track. Can initiate self-verification, link NIN, submit credentials, and track verification progress.
Verification Officer	MDA Audit Staff	Access to Admin Employee Directory and Document Verification tabs. Can inspect files and mark credentials as Verified/Rejected.
System Admin	Director of HR / ICT	Full access to Dashboard, Bulk Import, File Manager, Global Settings, RBAC Role Management, and User Permission controls.
Super Admin	Head of Service / Governor's Office	Global system control, audit log inspection, system settings override, and role permission assignments.

3. Module 1: Employee Self-Verification Guide

Civil servants can access the verification portal at /register to submit their bio-data, identity credentials, and official employment history.

Important Prerequisite: Employees must have a valid 11-digit National Identification Number (NIN), Bank Verification Number (BVN), clear digital copies of credentials, and active email address before starting.

3.1 Step 1: NIN Verification & Biometric Identity Lookup

1. Navigate to the Registration Portal page at /register.
2. Enter your **11-digit NIN** into the NIN verification box.
3. Click the green **'Verify NIN'** button. This triggers the integrated NIMC identity check dialog.
4. Once identity is matched successfully, the system automatically populates verified official identity data (Full Name, Date of Birth, Gender, LGA of Origin) directly into your registration form.

3.2 Step 2: Personal Information Entry

Provide comprehensive personal information in the designated input fields:

Field Name	Description & Format	Requirement
First & Last Name	Legal name matching NIN records exactly.	Mandatory
Email Address	Active personal/official email for status notifications.	Mandatory
Phone Number	11-digit Nigerian telephone number (e.g. 08031234567).	Mandatory
State & LGA of Origin	Taraba State LGA selection (e.g. Jalingo, Wukari, Bali, Sardauna).	Mandatory
Residential Address	Current residential location in Taraba State.	Mandatory

3.3 Step 3: Employment Details & Service History

In Step 3 of the wizard, enter your official civil service employment details:

- **Ministry / Department / Agency (MDA):** Select your current station or ministry (e.g. Ministry of Education, Health, Agriculture, Post Primary Schools Management Board).
- **Staff ID / Service Number:** Unique civil service identifier (e.g. TS/EMP/2026/042).
- **Designation / Rank & Cadre:** Current official title (e.g. Senior Administrative Officer, Education Officer I).
- **Grade Level & Step:** Select GL 01 to GL 17 and Step 01 to 15.
- **Date of First Appointment & Last Promotion:** Official dates recorded in your service book.
- **Bank Account & Pension Details:** Enter your 10-digit NUBAN account number, Bank Name, PFA Name, and RSA PIN number.

3.4 Step 4: Credential & Document Upload

Upload legible, scan-quality PDF or Image files (PNG/JPG up to 5MB each) for mandatory document verification:

1. **National Identity Card / Slip (NIN)**
2. **Letter of First Appointment**
3. **Letter of Confirmation / Present Promotion**
4. **Highest Educational Certificate (FSLC, SSCE, NCE, HND, BSc)**
5. **Birth Certificate / Declaration of Age**

3.5 Step 5: Final Review & Registration Slip Generation

Cross-check all information on the summary review screen. Upon clicking '**Submit Registration**':

- The system generates a unique **Registration Number** (e.g., TSG-VER-894120).
- A downloadable/printable official **Verification Acknowledgment Slip** with QR Code is generated instantly.
- An email acknowledgment containing your tracking code is dispatched to your email address.

4. Module 2: Tracking Application Status

Employees can monitor the status of their verification request at any time by navigating to /track.

4.1 Lookup via Registration Number / Staff ID or Email

1. Open /track on any mobile browser or desktop computer.
2. Choose search tab: **'By Registration / Staff ID'** or **'By Email Address'**.
3. Enter your unique ID or email and click **'Track Verification'**.

Status Badge	Meaning & Current Stage	Required Action
Pending Review	Application submitted successfully. Awaiting MDA verification officer review.	No action needed. Check back periodically.
NIN Verified	Identity confirmed via NIMC. Awaiting administrative credential clearance.	No action needed.
Approved & Active	Record fully audited, verified, and enrolled in the state digital payroll directory.	Download/Print official clearance certificate.
Rejected / Flagged	Discrepancy detected in documents or bio-data during admin audit.	Click 'Re-Verify NIN / Update Record' to submit corrected credentials.

4.2 Online Re-Verification & Post-Submission Update

If an employee record has an unverified NIN or needs corrections, the employee can click **'Verify NIN Now'** on the tracking result page. This launches the modal dialog to complete identity confirmation without having to re-fill the full form.

5. Module 3: Admin Panel Comprehensive Operational Guide

The Administrative Portal at /admin empowers designated state verification officers, HR directors, and system administrators to oversee the complete civil service audit workflow.

5.1 Secure Administrator Login & Access Control

1. Access the administrator sign-in page at /auth/login.
2. Input your assigned official admin email address and secure password.
3. Upon authentication, the system validates session tokens and loads administrative routes governed by your assigned role permissions.

5.2 Executive Dashboard & Real-Time Analytics (/admin/dashboard)

The Executive Dashboard provides instantaneous macro-level visibility into state verification progress:

- **Metric Cards:** Displays Total Enrolled Employees, Active Verified Staff, Pending Applications, Flagged Discrepancies, and Total Archived Credentials.
- **Status Breakdown Visualizer:** Bar charts and percentage breakdowns comparing verified vs pending records across departments.
- **Recent System Activity Log:** Real-time feed of employee registrations, document approvals, role changes, and system settings modifications.
- **Quick Action Panel:** One-click access to add single employee, launch bulk CSV import, or review pending document queue.

5.3 Employee Management Directory & Filter Engine (/admin/employees)

The primary employee management hub provides powerful data table capabilities:

- **Search Bar:** Real-time search across Employee Name, Email, NIN, Staff ID, or BVN.
- **Multi-Criteria Filtering:** Filter records by Department/MDA, Verification Status (Active, Pending, Rejected), Cadre, or LGA.
- **Employee Details Drawer:** Clicking on any employee opens a comprehensive profile view showing complete personal history, employment timeline, bank details, pension data, and uploaded document attachments.
- **Manual Record Addition (/admin/employees/add):** Allows administrative officers to register new civil servants directly with full validation checks.

5.4 CSV / Excel Bulk Employee Data Import Tool

To onboard existing MDA registers or teacher databases seamlessly:

1. Click **'Import CSV / Excel'** on the Employee Directory toolbar.
2. Download the official standardized template spreadsheet.
3. Populate required columns: *firstName, lastName, email, department, position, nin, bvn, salaryStructure, gradeLevel, step*.
4. Drag and drop the file into the upload zone. The system validates headers, flags duplicate NINs/emails, and executes bulk database creation with transaction rollback protection.

5.5 Document Verification & Credential Audit Workflow (/admin/documents)

The document audit console ensures every civil servant credential undergoes rigorous administrative inspection:

Step	Action	System Effect
1. Select Document	Officer clicks on pending document item from queue.	Loads inline high-resolution previewer (PDF / Image).
2. Credential Audit	Inspects certificate authenticity, dates, names, and seal.	Compares credential data against employee profile history.
3. Status Decision	Click 'Approve Document' or 'Reject Document' .	Updates document badge to Verified/Rejected. Recalculates verified document count.
4. Audit Log	Enter rejection reason if declining credential.	Dispatches system notification to employee tracking dashboard.

5.6 Enterprise File Manager & Folder Operations (/admin/files)

The central File Manager module allows admins to organize government circulars, verification reports, and policy documents:

- **Folder Navigation:** Create nested folders with custom scopes (Global, Departmental, System).
- **File Upload & Storage:** Upload official documentation, archive templates, and audit reports.
- **Bulk Operations:** Rename, move, delete, or download archived files securely.

5.7 Role-Based Access Control (RBAC) & Custom Roles (/admin/roles)

Security is governed by dynamic roles configured under /admin/roles:

- **Create Custom Role:** Click 'Add New Role', specify Role Name (e.g. *MDA Audit Supervisor*) and Description.
- **Permission Assignment:** Check specific permission boxes granted to the role.
- **Status Toggle:** Enable or disable administrative roles instantaneously without deleting historical audit logs.

5.8 Granular Permissions Management Engine (/admin/permissions)

System capabilities are organized into modular permissions across key functional modules:

Module	Permission Key	Description & Capability
Employees	view_employees edit_employees delete_employees	Read employee directory, update bio-data, purge duplicate records.
Documents	view_documents approve_documents	Access credential repository, approve or reject uploaded certificates.
System & Files	manage_files manage_settings manage_roles	Full control over file manager, global branding, and RBAC security rules.

5.9 Global System Settings & Custom Branding (/admin/settings)

System administrators can dynamically customize application appearance and global settings:

- **Global Application Name:** Change system display name (e.g. *Taraba State Verification Portal*). Changes propagate across headers, login titles, and document slips instantly.
- **Logo & Branding Upload:** Upload state emblem or custom seal logos.
- **Notification & Email Gateway:** Configure SMTP credentials and automated notification templates.

5.10 Administrator Profile & Security Settings (/admin/profile)

Administrators can update personal account details, change passwords securely using bcrypt encryption standards, and view recent security login timestamps under /admin/profile.

6. Security, Compliance & System Troubleshooting

Security Best Practices:

1. Always log out of administrative sessions when leaving workstation unattended.
2. Do not share admin credentials; ensure each officer is assigned a individual role-based account.
3. Verify that uploaded credentials match NIN identity records before approving employee profiles.

Common FAQs & Troubleshooting:

Issue / Question	Root Cause	Recommended Solution
NIN Verification fails during registration.	Network timeout or NIMC service downtime.	Ensure 11-digit NIN is correct. Retry after 2 minutes or use manual review option.
Document upload error (File size too large).	Uploaded file exceeds 5MB limit.	Compress PDF or JPEG image below 5MB using standard compression software before re-uploading.
Employee status stuck on 'Pending'.	Awaiting departmental audit review.	Contact assigned MDA Verification Officer to audit documents in /admin/documents.
Admin password forgotten.	Credential lockout.	Contact System Administrator or execute password reset via database CLI script.

Technical Support & Inquiries:
